

DON'T LEAVE IT TO THE CHILDREN!

A Conference on 23 October 2015¹

(the day before the 2015 Rugby World Semi Finals)

Rydges Hotel, Kensington, London, UK

A conference bringing you thought leadership from the mature economies of the northern hemisphere – for people personally interested in the progressive distribution of hard earned wealth.

There is a pressing need for the education of wealthy families in the area of “how best to transfer wealth or, much harder, a business to the next generation”. It is well known that the next three decades will see a massive inter-generational transfer of wealth. These people have a problem² and they do not always realise it: the good news is that families do not have to be victims of their own success.

Thought leadership from more mature economies suggests that tax and philanthropy require more attention in Australia. There is a wealth of information available and Legacy Law has curated a conference with renowned international expert speakers bringing ideas and real-life business and sporting instructive tales.

Speaker

Alan Crosbie, author of *Don't Leave it to the Children*, is the fifth generation to have run a successful family business in Ireland. He has studied family business in Switzerland and Harvard and will share his thought leadership on how professionals can best work with families who have a business that they want to successfully pass on to the next generation.

Other leading speakers to be announced.
